

Industrial immersion heaters - weathertight

Hotstart's weathertight industrial immersion heaters can be used for the heating of many fluids for engines and equipment, like lube oil, hydraulic fluid, coolant, water, antifreeze, asphalt, petroleum, and other crucial fluids.

Hotstart's immersion preheaters include a fixed setting thermostat; optional thermostat ranges are available. The weathertight immersion heaters are CSA C/US or CE approved. The heaters are available with both threaded fitting and threadless fitting to assure perfect fit for your system and easy installation.

Specifications	
Primary heating	Engine coolant; water; lubrication oil; hydraulic oil
Primary heat power	1 kW; 1.5 kW; 2 kW
Power sources	<ul style="list-style-type: none"> • AC, single-phase, 50/60 Hz • AC, three-phase, 50/60 Hz
Voltages	120V; 208V; 240V; 277V; 380V; 480V
Power connectors	Hardwired
System ingress	NEMA 4
Certifications	<ul style="list-style-type: none"> • CSA C/US • CE-compliant models available
